Japanese beds are narrower than Western ones, so sizes are cut to the Japanese schedule rather than converted. Futon covers are made to your futon's dimensions.

These are our standard schedules. Every size is confirmed against your own measurements before sampling, and any other size is made on request.

How to measure bed linen

1. Measure the mattress, not the bed frame: width, length and depth.
2. A fitted sheet is the mattress width and length, with a pocket a few centimetres deeper than the mattress, topper included.
3. A flat sheet needs enough cloth to cover the mattress depth on both sides and tuck under.
4. A duvet cover is cut to the duvet, which is usually wider than the mattress and differs by country even where the bed name is the same.
5. Send us the pillow size you sell. Pillowcases change more between countries than any other piece.
